How do I pair my Rigel device via Bluetooth on Windows 10?

On the computer, select settings within the start menu and search for 'Bluetooth and other devices'. Select 'Add Bluetooth or other device'.

Image not found or type unknown

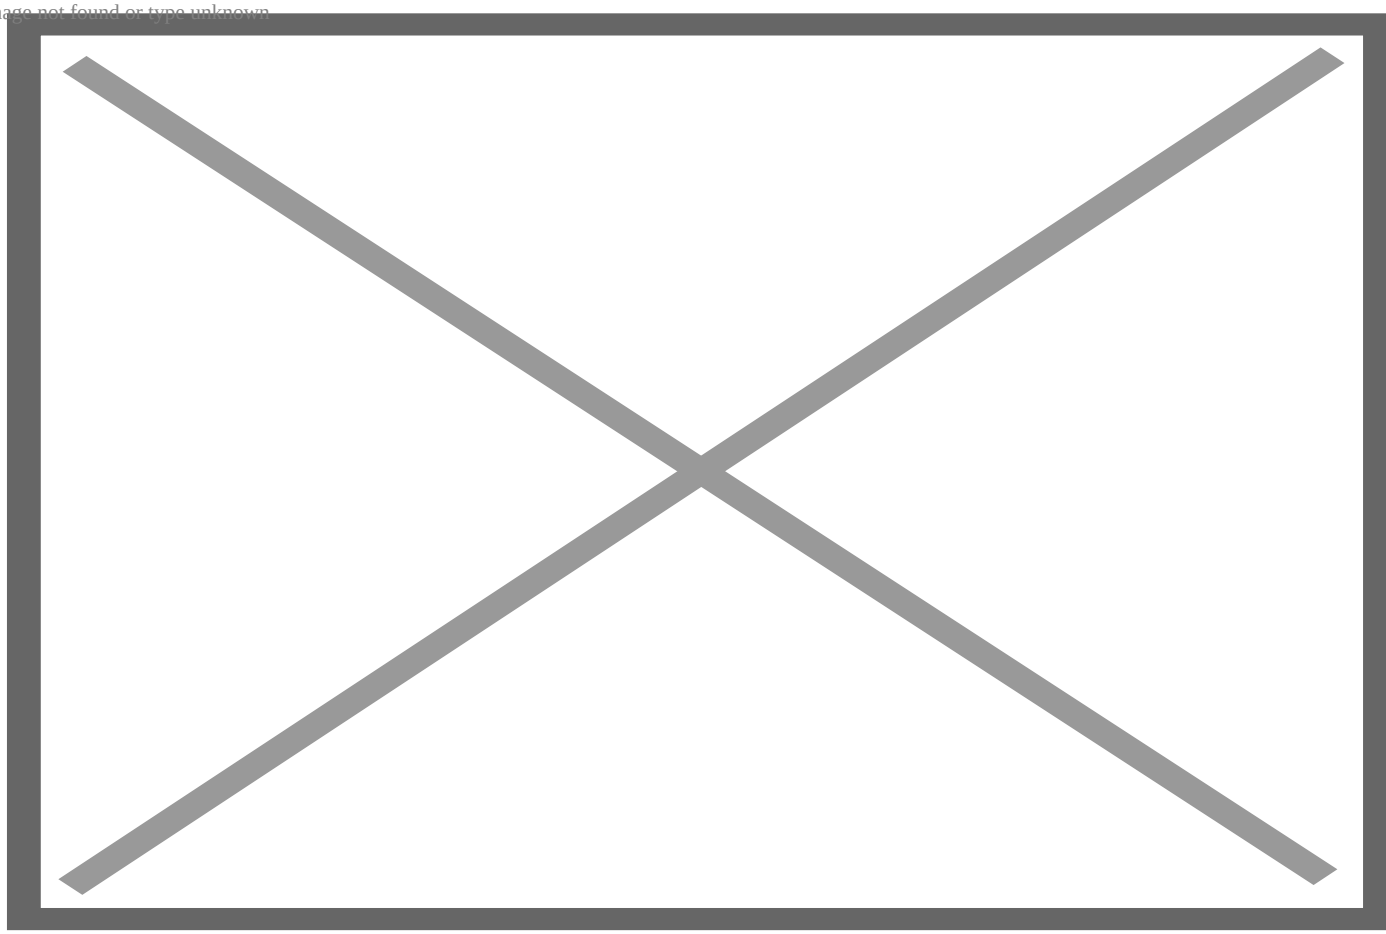
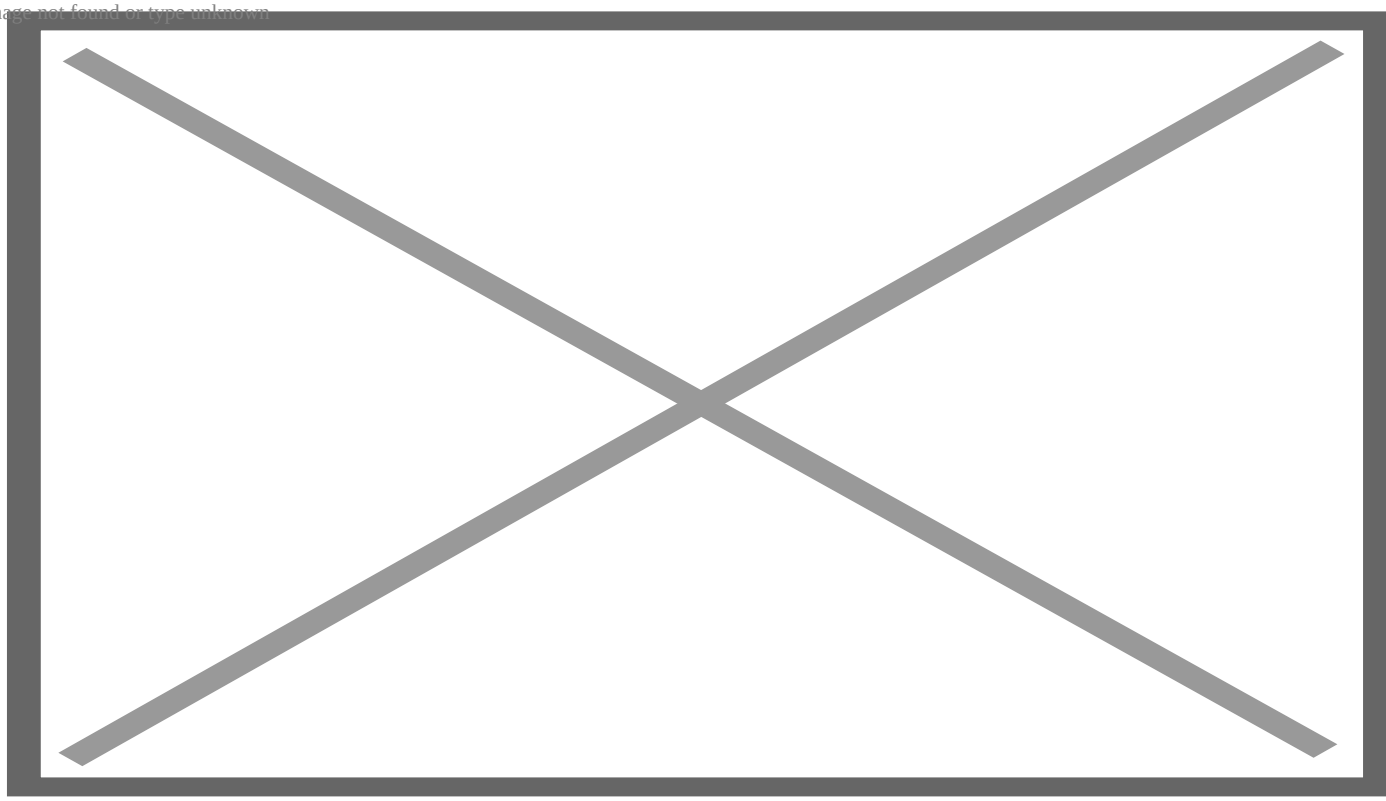
Navigate to the device manager.

Image not found or type unknown



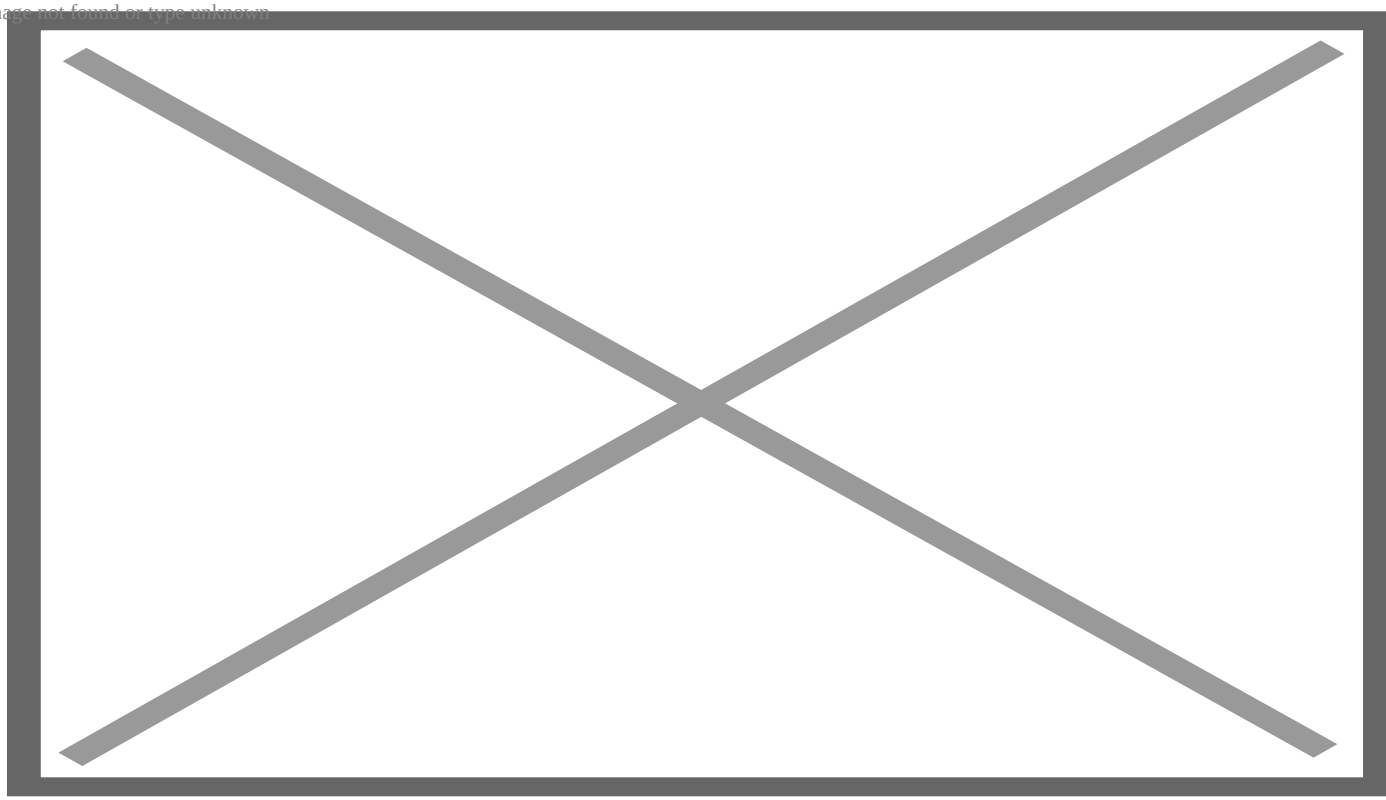
You will notice a BT com port and a serial com port

Image not found or type unknown



Open the serial com port by right clicking and selecting properties.

Image not found or type unknown



Correctly enter the port settings, as seen in the picture and then select advanced settings.

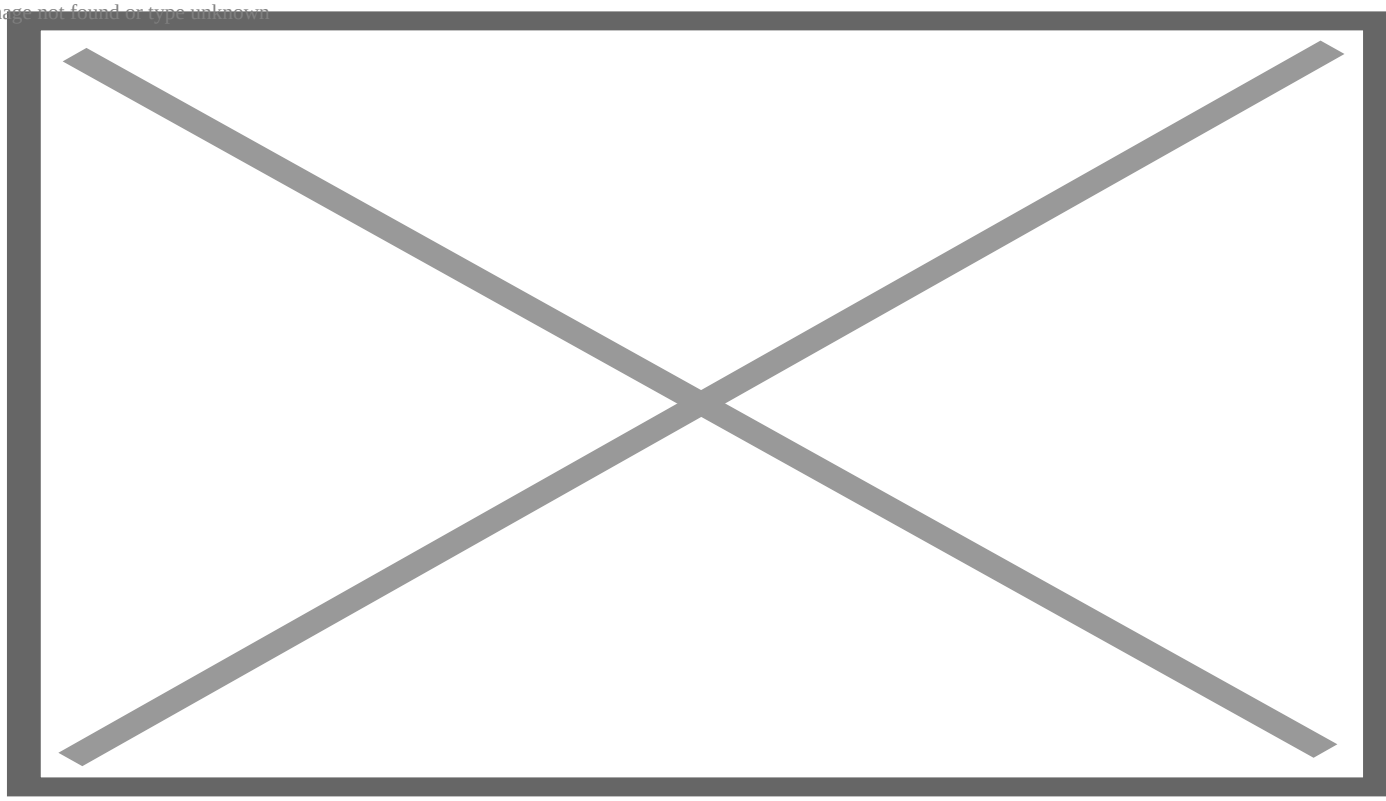
Your BT port should now be linked with the serial to BT

Image not found or type unknown



You should now be able to download to Med-eBase or via DataTransfer.
