How do I download test sequences to the Uni-Therm?

The file download has the most common test sequences available for the Uni-Therm. See below for the full list.

How to download the test sequences:

1. Download the file to an empty memory stick.

2. Connect the memory stick to the Uni-Therm USB slot.

3. Go to Menu-Data-Transfer Data- select Import test sequences using the F2 button- Select Memory stick in the port area using F3, then select F4 to start the transfer.

4. To make sure you have successfully downloaded the test sequences- from the home page press Menu- Set Up - Test Sequences. You will see the list of test sequences available.

Please note that we are not responsible for the use of these test sequences and they should be used in conjunction with the OEM service procedure.
